

Spatial Econometrics

Moinul Islam

9/16/2022

Table of contents

Preface	3
1 Basics for GIS and spatial data	4
2 Data, spatial classes and basic graphics	5
3 Basic operations in the R software	6
4 Spatial microeconometrics modeling	7
5 Cross-sectional spatial linear models	8
6 Non-linear spatial models	9
7 Linear regression model with spatial data	10
8 Panel data models with spatial data	11
9 Applied spatial econometrics	12
10 Geographically weighted regression	13
11 Spatial point pattern analysis	14
12 Spatial interpolation	15
13 Big data applications	16
14 Processing of large data set	17
15 Analysis of large raster data	18
References	19

Preface

This is a spatial econometrics book which can be utilized as an economic policy tool.

1 Basics for GIS and spatial data

2 Data, spatial classes and basic graphics

3 Basic operations in the R software

4 Spatial microeconometrics modeling

5 Cross-sectional spatial linear models

6 Non-linear spatial models

7 Linear regression model with spatial data

8 Panel data models with spatial data

9 Applied spatial econometrics

10 Geographically weighted regression

11 Spatial point pattern analysis

12 Spatial interpolation

13 Big data applications

14 Processing of large data set

15 Analysis of large raster data
